

POLITICS

Nito ensures that the quality and environmental policy is fully understood, implemented and continuously developed at all levels in the organization and communicated to relevant stakeholders outside Nito.

Nito's Quality Policy:

- We will strive to meet the individual customer's needs and expectations.
- We will constantly develop the company's processes, products and marketing.
- We will be characterized by the values of initiative, cooperation, credibility and commitment.
- Our products must be represented by the leading wholesalers in industry, plumbing and construction markets.

Nito's Environmental Policy:

- We take an active part in protecting the environment and the natural resources through sustainable development.
- With active environmental management, we will protect the environment and ensure continuous improvements.
- We make sure to focus on the environmentally damaging conditions in the company and to reduce them.
- We aim to exceed the environmental requirements set by the authorities as well as other binding obligations.
